Training Packages Policy

MGTD Pirii will ensure that all training packages that are within the scope of registration of the company and in use within the company, including those imported from other sources are regularly checked for currency.

This will be confirmed by checking publication on the national register:

- For a training package, training package qualification, training package unit of competency or training package skill set: the ‘Release date’ as indicated in the ‘Release history’ on the national register for the relevant training package, training package qualification, training package unit of competency or training package skill set for an accredited course: the ‘Currency period start’ as indicated in the ‘Accredited course details’ on the national register for the relevant accredited course.

- Superseded training package and/or training package unit when a new training package qualification replaces an existing qualification, the existing qualification is referred to as a ‘superseded training package qualification’. When a new unit of competency replaces a unit, the existing unit is referred to as a ‘superseded unit of competency’.

- When assessing compliance with ASQA requirements and those of AQT 2nd Edition 2013 will apply an overarching principle that a student is entitled to receive the current (endorsed or accredited) training product, unless the student would be genuinely disadvantaged in transferring to that product under the prescribed transition arrangements. In these cases, MGTD Pirii will apply for a period to teach-out the student in his/her existing qualification and will demonstrate, upon request, how the student would have experienced genuine disadvantage if made to transition earlier.

In addition all training materials shall be subjected to regular validation to ensure validity, currency, reliability, flexibility and fairness. Validation shall be in line with the requirements of the Standards for RTO 2015.
